

QGraphicsItem

```
classDiagram
    class QGraphicsItem
    class GPion {
        +GPion()
        +boundingRect()
        +paint()
        +couleur()
        +couleur()
    }
    GPion --|> QGraphicsItem
```

The diagram illustrates a class hierarchy. At the top is the 'QGraphicsItem' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it is the 'GPion' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. The middle compartment is empty. The bottom compartment contains a list of methods: '+ GPion()', '+ boundingRect()', '+ paint()', '+ couleur()', and '+ couleur()'. A blue arrow with an open triangle head points from the 'GPion' class to the 'QGraphicsItem' class, indicating inheritance.

GPion

+ GPion()
+ boundingRect()
+ paint()
+ couleur()
+ couleur()
